The **International Workshop on Wireless Sensing Technologies and Applications 2023 (IWSA 2023)** is a platform for professionals, researchers, and practitioners in wireless sensing technology. It aims to foster knowledge exchange, innovation, and collaboration in this field. As part of this workshop, the *InnoMaker* Innovation and Technology Solutions Competition has been launched. This competition aims to bridge the gap between scientific research and industry by combining research results with practical applications. We invite enterprises to submit technical problems and sponsor the competition. International experts and scholars are also invited to contribute technological solution proposals that meet practical application requirements:

- ✓ The role of the solution in addressing technical difficulties of companies;
- ✓ Overcoming technical difficulties and its value to companies;
- ✓ Feasibility of the solution and work plan;
- ✓ Practicality of the implementation budget.

- **Participation Fee:** The fee for each company to participate is MOP 38,000. Participating companies can submit a technical problem as part of the *InnoMaker* competition. Additionally, your company will receive an exhibition booth at the conference and the chance for two personnel to engage in networking activities.
- **Best Solution Selection:** A panel of experts will evaluate the submitted solutions and award prize money to the best solutions from each company. Participating companies will be invited to an awards ceremony where the winning solutions will be announced and awarded.
- **Solution Details:** The submitted solutions should provide a detailed explanation of the proposed method, containing a minimum of 10 pages of content.
- **Contact Information:** For further details, please contact the *InnoMaker* coordinator at [InnoMaker@apmtt.org].
